Web Security Assessment

Devfense Web Security Assessment helps you keep your web applications secure by identifying and reporting your web vulnerabilities and recommending security fixes.

Devfense WSA helps organizations protect against web application vulnerabilities such as those identified in the WASC (Web Application Security Consortium), OWASP (Open Web Application Security Project), and SANS (SysAdmin, Audit, Network, Security) Institute's top 20 – including cross site scripting, injection flaws, and buffer overflows.

Get better security for your web applications. Devfense WSA:

- Addresses known security vulnerabilities such as cross site scripting and SQL injection. Tests for vulnerabilities identified by OWASP Top Ten, WASC and SANS Top 20
- Provides advanced security coverage of Web 2.0 technologies, including support of Flash, JavaScript, AJAX, JSON and web services
- Delivers reports of compliance with your industry's regulations such as PCI DSS, HIPAA and SOX.
- Plugs into existing IT environments
- Maintains an assessment of your compliance efforts
- Delivers Boonbox knowledgeable IT security expertise to fix known web security issues.

Guard Your Corporate Assets

Web-based attacks can lead to loss of revenue, lower consumer confidence, devaluation, as well as failure to comply with government and industry mandates. Proactively manage and prevent the risk of hackers stealing corporate or personal data or bringing down systems. Ensure your web applications are secure

Every 14 seconds a website is infected worldwide
- Sophos Expert Report

70% of online apps fail to meet the regulatory requirements
- Forrester Research

About Boonbox
Boonbox, a division of Pacific Coast Information Systems Ltd. (PCIS), specializes in productivity solutions that deliver immediate results. We enable and enhance your IT department's ability to address security, compliance and data integrity issues.

Boonbox customers benefit from a boxed service approach that brings measurable results of proven expertise packaged with technology.

Devfense WSA fortifies security compliance of existing web applications and projects in development.

prior to public release.

Get Security in Your Web Application Life Cycle

Devfense WSA identifies programming oversights that result in web security flaws and non-compliance. It creates a report showing prioritization of issues and recommendations for fixes. The cost of correcting vulnerabilities is less when performed early during pre-production detection than it is post-production, or worse, after an attack.

Improve Security Compliance

Devfense WSA produces customized compliance reports specifically applicable to your industry. Better understand your security compliance requirements for regulations including Payment Card Industry Data Security Standard (PCI DSS), Payment Application Best Practices (PABP), Sarbanes-Oxley Act (SOX), Health Insurance Portability and Accountability Act (HIPPA), Federal Information Security Management Act (FISMA), Gramm-Leach Bliley Act (GLBA) or other regulations that apply to your organization.

Begin to protect your web applications today with Devfense WSA.

Devfense WSA finds and reports breaches in your web security before they happen
